ENTERPRISE AI / EMBEDDED TEAMS

Add AI specialists to your enterprise team.

Dockio-employed professionals work within your AI programme, systems, controls and delivery priorities. Named people, availability and terms are confirmed in the proposal.

Company at a glance

Legal entity	Dockio Technosolutions Private Limited
Operating base	Mumbai, India. India-based remote, hybrid or on-site arrangements are discussed against the requirement; other countries require feasibility review.
Leadership	Sankalp Shirish More, Director
Partner status	OpenAI Select Partner. Dockio supplies independent services; OpenAI does not employ, screen or guarantee Dockio personnel.

Two engagement models

Individual specialist: extend an existing client team under agreed day-to-day direction and scope.
Managed team: a proposed combination of roles with a delivery lead, defined responsibilities, milestones and reporting.

Role coverage

AI engineer	AI workflows, retrieval, tools, model APIs and integration.
Solution architect	Architecture, identity, data boundaries and deployment design.
AI product lead	Use cases, value hypotheses, backlog and acceptance criteria.
Evaluation specialist	Quality criteria, evaluation sets, failure analysis and release evidence.
Adoption lead	Enablement, workflow change, feedback and meaningful repeat use.
Programme principal	Delivery governance, dependencies, escalation and sponsor decisions.

These are role capabilities, not CVs, a pre-vetted roster or a claim of an immediately available bench. Request named profiles for your specific requirement.

PROCUREMENT / READINESS

Evaluate the evidence. Agree the commitment.

Use this checklist before approving an engagement. Items below require confirmation; this statement is not a certification, insurance certificate, service-level commitment or representation that every document is already available.

Evidence and terms to confirm

Company & tax	Current incorporation, registration, tax and authorised-signatory documents applicable to the contracting entity.
Employment & screening	Named-person employment arrangement, technical assessment, client-required background checks and completion evidence.
Insurance	Current professional and cyber insurance certificates, insured entity, limits, scope, exclusions and expiry. Coverage is not verified in this statement.
Security & privacy	Applicable policies and evidence for access, devices, confidentiality, approved AI use, data handling, incident escalation and offboarding.
Commercial terms	Rates, term, any minimum commitment, invoicing, expenses, notice, liability, IP ownership and confidentiality in the MSA/SOW.
Continuity	Replacement triggers, notice, transition support, overlap, knowledge transfer and associated charges agreed in writing.
Delivery evidence	Named credentials, permitted references or anonymised evidence where available. Individual career experience is distinct from Dockio-contracted engagements.

Onboarding sequence

1. Define: role, seniority, work, location, duration and client owner.
2. Review: candidate fit, availability, assessment and screening requirements.
3. Agree: proposal, responsibilities, terms and access boundaries.
4. Onboard: approvals, client environment, delivery rhythm and review points.

No universal deployment time or minimum duration is stated. Start dates depend on candidate availability, checks, contracting and client approvals. Confidential evidence should be exchanged only through an agreed channel, under NDA where appropriate.
